With respect to claims 20, the limitations were previously addressed above in the rejection to claims 4-5, 11-12, and therefore rejected under similar rationale.

With respect to claims 21, Thomson further teaches an after-sales service and customer care (ASCC) center for issuing said electronic ASCC voucher and for coordinating, tracking, and carrying an insurance policy for said ASCC program [0062 0090].

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 3, 10, 22, 26, are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomson in view of article by Sally Trelford titled, "Choice rewards", hereinafter Trelford.

Claim 3, 10, further recite the after-sales service customer care (ASCC) center providing an incentive voucher for enabling said customer to reward said ASCC provider according to a customer satisfaction assessment by said customer. Thomson teaches that the warranty administrator issues satisfaction surveys to the customer in which the customer can rate the service received [0081]. Thomson does not specifically disclose using the incentive voucher/ satisfaction assessment as a form of rewarding

Application/Control Number: 09/851,793

Art Unit: 3622

the service provider for the service received. Trelfold on the other hand, teaches issuing retail vouchers for individual performance (page 2). It would have been obvious for a person of ordinary skill in the art at the time of Applicant's invention to have included in the system of Thomson the teachings of Trelfold of using the incentive vouchers/satisfaction assessment as a form of rewarding the service provider for the service provided because such a modification would motivate the service providers to increase productivity and quality.

With respect to claims 22-26, Thomson teaches a network system connected with an Online service provider (GSP) selling goods-or services to an Online customer through the network system (Figure 13). An after-sales-service and customer care (ASCC) center for issuing an electronic ASCC voucher defining an ASCC program related to sales of said goods-or-services wherein said electronic ASCC vouchers are provided for transmitting over said network (i.e. the user logs onto the warranty administrator's web site to purchase the warranty of the product purchased, the conditions and terms of the warranty are transmitted to the customer electronically) [0053 0054 0055 0057]; a plurality of after-sales-service customer care (ASCC) providers connected to said network [0080]; transmitting said ASCC voucher from said Online customer and providing direct contact between the online customer and ASCC provider to enable to arrange for said ASCC program [0102 0109].

With respect to the after-sales service customer care (ASCC) center providing an incentive voucher for enabling said customer to reward said ASCC provider according

Application/Control Number: 09/851,793

Art Unit: 3622

to a customer satisfaction assessment by said customer. Thomson teaches that the warranty administrator issues satisfaction surveys to the customer in which the customer can rate the service received [0081]. Thomson does not specifically disclose using the incentive voucher/ satisfaction assessment as a form of rewarding the service provider for the service received. Trelfold on the other hand, teaches issuing retail vouchers for individual performance (page 2). It would have been obvious for a person of ordinary skill in the art at the time of Applicant's invention to have included in the system of Thomson the teachings of Trelfold of using the incentive vouchers/satisfaction assessment as a form of rewarding the service provider for the service provided because such a modification would motivate the service providers to increase productivity and quality.

## Response to Arguments

- 6. Applicant is reminded that claims 27-50 have been canceled previously and therefore the pending claims are 1-26.
- 7. Applicant argues that Thomson's warranty administrator never sends anything as an electronic voucher to a customer that a customer can use at his or her will. The Examiner disagrees with Applicant because the e-mail received by the customer contains the administrator's URL which enables the customer to gain access to the customer's personalized portion of their warranty (paragraphs 53, 55 and 57). The customer's personalized portion of the customer's warranty enables the customer to use their purchased product warranty at a service provider of their choice, the customer buys insurance or warranty "through the electronic warranty administrator or through

Art Unit: 3622

third party issuers [0062]. In Thomson, the customer controls the terms of the warranty and the customer then takes this service warranty to the service provider or manufacturer as payment for service [0064] [0091]. In addition Figure 10 clearly teaches the customer communicating with the service provider for repairs or service, so therefore in some embodiments of Thomson, the customer has control of the repair and service process.

8. Applicant argues that Trelford's power of rewarding the quality of service is controlled by an employer not by a customer directly. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck* & Co., 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). Trelford was merely cited for issuing retail vouchers for individual performances (page 2) and Thomson was cited for customer controlling and selecting the after care service.

## Point of contact

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raquel Alvarez whose telephone number is (571)272-6715. The examiner can normally be reached on 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric w. Stamber can be reached on (571)272-6724. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
